Table of Contents

The surgical center: concept, care, cost in freestanding facility
Boyden L. Crouch, M.D., John L. Ford, M.D., and *Wallace A. Reed, M.D.* . 7

Innovations in equipment, design featured in eye-surgery suite
Robert E. Christensen, M.D., and *Bradley R. Straatsma, M.D.* 11

O.R. question box
Carl W. Walter, M.D., and *Dorothy W. Errera, R.N.* 19, 45, 69

Hazards from electrical equipment
Howard M. Hochberg, M.D., Charles G. Battig, M.D.,
and *Marvin Eisenberg, Ph.D.* 21

3-prong outlets, 3-prong plugs needed for safer electrical environment 29

AAMI outlines steps to help protect patients from electrical hazards 30

Selected bibliography
Dorothy W. Errera, R.N. 32, 40, 68, 82

Multiple factors to consider in hospital infection control
Carl W. Walter, M.D. 35

Legal liability of the O.R. nurse
Edward J. Flynn 58

Advantages, drawbacks of ketamine, other anesthetic agents 61

The urological assistant: new aid in growing manpower shortage
Russell Church, R.N., B.S., and *George T. Mellinger, M.D.* 71

How an ex-O.R. nurse functions as a physician's assistant
Lynne Hefferon, R.N. 74

Planning effective inservice program for O.R. nurses and technicians
Joan Miller, R.N. 76

Use of laminar airflow in O.R. suite topic of NASA-sponsored symposium 83

Special equipment, apparel used in hip surgery in 'greenhouse' 91

Index 94

INDEX

air-borne infection 36, 37, 45, 85, 86
air conditioning
maintenance of 38
operating room 12
anesthesia
agents, results with 61-67
console for 16
equipment, disinfection of 48
flammable agents for ..20, 25, 26, 27, 65
for cesarean section 65, 66
gas, leakage of 86
induction rooms 16
in patient's room 69
transfusion reaction 66
antibiotics, prophylactic 35
beards, sideburns 38, 66, 67, 78
bowel, preoperative disinfection of 35
burns
from electrosurgical units 22, 23, 27, 32
carpeting 24
carriers in infections 19, 37, 38, 40, 41, 83, 84
clothing
in laminar-flow O.R. 86, 87, 91, 92
in O.R. 70
conductive jelly 28
conductivity 24
control desk 12
cultures
floors 19
personnel 19, 38
dental equipment, contamination in 41, 42
distilled water 51
doors in O.R. 19, 20
drapes
disposable 39, 47
double-thickness 47
plastic adhesive 43
education on electrical safety 31
electrical system, standards for design 26
electrolysis, injuries from 32, 33
electrostatic hazard 24, 25
electrosurgical units, design defects in 24
endotracheal tubes
antistatic 32
problems in resterilizing 68
equipotential environment 30
testing for 31
ethylene-oxide sterilization 36, 37, 52, 53, 54
of wood 50
residuals 44, 53, 54, 68
resterilization of catheters 53
toxic reactions 53, 54
explosion hazards 28, 69
explosion-proof outlets 28
filters, HEPA 84, 85, 87, 90
floors
care of 19, 53
conductive 19, 20, 28
terrazzo 12
fogging 38, 48
forceps, bipolar, use of 23
formalin 55
ground plates 22, 23, 24, 25
grounding 23, 24, 25, 26, 29, 30
of patient 24
hepatitis 67
halothane, use of 64-65, 66, 67
hazards
antistatic endotracheal tubes 32
electrostatic 24, 25, 27
from electrical equipment 21-28, 29, 30, 31, 32
in electroshock therapy 28
in monitoring patient with pacemaker 28
in oxygen systems 25
with lead wires 28
head coverings 69, 70
inhalation therapy equipment 36, 44
infections
after hip-replacement surgery 88, 89
carriers 19, 37, 38, 40, 41, 83, 84
control in hospitals 35-39
cost of 88
factors contributing to 35-39, 43
gram-negative 41, 42
in intensive-care unit 42
isolation of 38, 39
multiple-dose vials, hazards of 37
nebulizers, hazards in 36
postoperative 45
reduction in rate 89
inservice program for nurses 76-78
instrument washer-sterilizer 46, 51, 52
instruments
disinfection, chemical 55
preparation area 16
sterilization of 16, 47, 51, 52
storage 16, 55
intravenous fluids
equipment, shock potential in 27
isolation
infections 38, 39, 69
isolation transformer 22, 27
ketamine, use of 61-64, 66
laminar flow in O.R. 73-91, 91-92
lead wires, hazards with 28
leakage currents, hazards of 21, 22, 27, 30, 86
legal liability of O.R. nurse 58-61, 69
lint control in
laparotomy sponges 46
masks 37, 48
methoxyflurane, use of 67
morphine as anesthetic 64
muslin wrappers, thread count in 50
operating room
design of, for eye surgery 11-18
lighting in 14, 15, 16
monitoring in 16
television in 13
pacemakers, implanted
monitoring of patient 28
precautions for patient 28
packaging of sterile supplies 36
packs, opening of 46
paper wrappers 50
peritoneal dialysis, hazards 33
phenolic compounds 54
physician's assistant
acceptance of 82
nurse as 74-76
plugs, 3-prong 22, 25, 27, 28, 29, 33
quaternary ammonium compounds 54, 55, 56, 57
recovery room
care of infected patients in 69
equipment 12, 13
resterilization
of disposable packs 70
of plastic catheters 53
rubber bands, sterilization of 51
scarlet red gauze strips 46
shock, electrical 22, 23, 24
shoes, role in infection 70
skin, disinfection of 39, 56, 57
sponge counts 45, 46, 58
sterility indicators 52
sterilization
ampules, vials 49
blood-pressure cuffs 46
cautery tip 51
silicone 49
spinal needles 50
steam 36
suction bottle 47
terminal 47, 48, 53
wood 49
surgical center, freestanding 7-10
charges 8, 9
costs 9, 10
facility 8
personnel 10
procedures performed in 7, 8
surgery
eye, facility for 11-18
observation gallery 13
sutures, return of the reused 47
technicians, training of 78-81
temperature in O.R., effect on patient 34, 90
testing of electrical equipment 31
thermometer disinfection 55, 56
tracheal tubes, toxicity to tissues 68
transportation of patients 17, 18
ultraviolet radiation 35, 37, 42, 43, 88
ultrasonic nebulization for disinfecting inhalation therapy equipment 44
urological assistant, training and duties 71-73
ventricular fibrillation 21, 22, 30
visitors in O.R. 45
walls
coverings 19
flush-grouted 12
water
pseudomonas in 38
wounds
irrigation of 39
septic 42, 43, 45
wrappers for sterilization 50, 51
